🔗 Portfolio

OBJECTIVE

Enthusiastic Full Stack Java Developer with skills in Java, Spring Boot, Databases, and front-end technologies like HTML, CSS, and JavaScript. Passionate about building scalable, user-friendly web applications. Committed to continuous learning and collaboration to contribute effectively to dynamic development teams and innovative projects

SKILLS

Technical Skills:
- **Programming Languages:** Java, Python, JavaScript
- **Frameworks and Libraries:** Spring Boot, Hibernate, Spring MVC, React.js, Node.js, Express.js
- **Microservices:** Design and implementation using Spring Boot
- **Web Technologies:** HTML5, CSS3, Bootstrap, RESTful APIs
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Data Structures & Algorithms:** Proficient in problem-solving and algorithm design
- **Version Control:** Git, GitHub
- **Build Tools:** Maven, Gradle
- **Cloud Services**: AWS, Azure
- **DevOps Tools** : Docker
- **IDEs:** IntelliJ IDEA, Eclipse, VS Code

EDUCATION

BE in Computer Science
09/2021 – 05/2025 | Pune, India
JSPM's Jayawantrao Sawant College of Engineering - Aggregate Percentage: 84%

EXPERIENCE

Java Developer Intern - Present
Kody Technolab Ltd, Ahmedabad, Gujarat
06/2025
- Worked on Java-based backend development tasks under supervision.
- Gained hands-on experience with object-oriented programming and Java frameworks.
- Assisting in the development of RESTful APIs using Spring Boot.
- Involved in debugging, code reviews, and writing unit tests.

Web Developer Intern
Sparklab IT Solutions Private Limited
01/2024 – 02/2024
- Developed and designed a flower shop website and a mobile shop website, improving user experience and responsiveness.
- Utilized HTML, CSS, JavaScript, Bootstrap, and React to build dynamic and interactive web applications.

CERTIFICATES

- Java By kiran Training Institute Pune : Java Full Stack Development
- Master Java, Spring 6 and Spring Boot 3 with JDBC, JPA, Security, Docker and Microservices with Telusko- Udemy
- The Complete Full Stack Web Development Certificate - Udemy
- Complete Data Science Training: Math, Statistics, Python, Advanced Statistics in Python, Machine and Deep Learning-Udemy

PROJECTS

Food Court Online Food Delivery Website
Github 🔗   Online 🔗
- **Tech Stack:** MongoDB, Express.js, React.js, Node.js (MERN Stack)
- Designed and developed a full-stack online food ordering system, enabling users to browse menus, place orders, and track deliveries.
- Built an admin panel for efficient order management, enhancing operational workflow.
- Implemented a dynamic shopping cart and real-time order management system for a seamless user experience.
- Integrated secure user authentication and authorization using JWT for login and registration.
- Optimized database queries in MongoDB for efficient storage and retrieval of user profiles, food items, and order details.

Online Job Portal (Java Spring Project)
- **Tech Stack:** Java, Spring Boot, React, MongoDB, Hibernate
- Developed a web-based application that connects job seekers with employers, streamlining the hiring process.
- Implemented key features including user registration, job search, application tracking, and an admin panel for managing job postings.
- Built the backend using Spring Boot with Hibernate for efficient database management.
- Integrated MongoDB for scalable data storage, ensuring seamless performance and user experience.

Implementing Machine Learning Algorithms for Automation of Smart Village Data
- Developed and implemented machine learning algorithms to automate data processing for smart village applications.
- Analyzed datasets across agriculture, education, healthcare, and economic development to derive actionable insights.
- Built predictive models to improve decision-making and optimize resource allocation.
- Utilized Python, Pandas, NumPy, and Scikit-learn for data preprocessing, model training, and evaluation.
- Contributed to designing a scalable system for real-time data insights and automation.
